The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 5.

# (iv) Functional and presentation currency

Except where indicated to be otherwise, the interim financial information is presented in United States dollars, which is the Company's functional currency.

# 4. Summary of significant accounting policies (continued)

# (a) Taxation (continued)

To address the economic substance requirements, the Government of Saint Lucia introduced the Economic Substance Act No 33 of 2020 (ESA). Effective July 1, 2021, within 3 months after a year of income, a relevant entity shall submit to the Competent Authority an Economic Substance Return.

(b) Net gains and losses from financial assets classified as fair value through profit (FVTPL) or loss and fair value through other comprehensive income (FVOCI)

#### Financial investments at FVTPL

These assets are subsequently measured at fair value. Net gains and losses from these financial instruments include all realised and unrealised fair value changes but excludes interest, and distributions of partnership income and are recognised in profit or loss within 'net fair value gains on financial investments at FVTPL'. Realised gains and losses are calculated using the specific identification method.

# Financial investment at FVOCI

This asset is subsequently measured at fair value. Dividends are recognised as income in profit or loss when declared, unless the dividend clearly represents a recovery of part of the cost of the investment and are presented within 'dividend income from financial instrument at FVOCI'. Other net gains and losses are recognised in other comprehensive income and are never reclassified to profit or loss.

# 5. Critical accounting estimates and judgements in applying accounting policies

The Company makes estimates and assumptions that could affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events those are believed to be reasonable under the circumstances.

The fair value of the Company's unquoted investment in the Fund is based on the fair values of the Fund's underlying investments, which include common equity securities and corporate debt. The fair value of such underlying investments and investments held in Outsourcing Management Limited ('OML preference shares') and Merqueo S.A.S use valuation models that employ unobservable inputs for investments that are traded infrequently or not at all. These unobservable inputs require a higher degree of management judgment and estimation in determining the fair value.

Management judgement and estimation are usually required for the selection of the appropriate valuation model to be used, determination of expected future cash flows from the financial instrument being valued, determination of expected volatilities and correlations, and selection of appropriate discount rates. Consequently, the use of different assumptions and inputs could yield materially different results in the fair value of the Company's investment in the Fund and OML preference shares from those reflected in the statement of financial position.

#### Notes to the interim financial information

# 10. Earning per ordinary share

The Company may co-invest with the Fund in equity or debt securities of private companies located in the Caribbean and Latin America. #### Notes to the interim financial information

November 30, 2022 (Expressed in United States dollars unless otherwise stated) (Unaudited)

#### 12. Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction at the measurement date. Market price is used to determine fair value where an active market exists, as it is the best evidence of the fair value of a financial instrument.

For financial instruments which have no market prices, the fair value has been estimated using present value or other estimation and valuation techniques based on market conditions existing at the reporting date.

The Company measures fair value using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurement:

- Level 1: Inputs that are quoted market prices (unadjusted) in active markets for identical instruments.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using quoted market prices in active markets that are considered less than active or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.
- Level 3: Inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and those inputs have a significant effect on the instruments' valuation. This category includes instruments that are valued based on prices for similar instruments for which significant adjustments or assumptions are made to reflect differences between the instruments.

#### Accounting classifications and fair values

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The valuation of investments at fair value is as described in note 5.

The Company's investment in the Fund and OML preference shares are measured at fair value and classified at level 3. The following table shows the valuation techniques used in measuring the fair value of the Company's unquoted investments, as well as the unobservable inputs used.

Valuation techniques	Unobservable inputs	Inter-relationship between key unobservable inputs and fair value measurement
Market - comparable companies or external offers	Adjusted EBITDA multiple range of 5.00-11.50 times	The estimated fair value would increase/(decrease) if: Adjusted EBITDA was higher/(lower)
	5%-15% liquidity discount	The liquidity discount was (higher)/lower

Cash and cash equivalents, securities purchased under resale agreements and receivables are classified at amortised cost. The fair values of these financial assets approximate their carrying values due to their short-term nature. The fair value of redeemable preference shares, convertible debt notes and bond payable are assumed to approximate their carrying value, as no discount on settlement is anticipated.
